# GETTING THERE THE SUSTAINABLE WAY

UCD's Travel Plan  
2016-2021-2026

2017 Update

# Making it easier for you

---

## 192 new cycle parking spaces

It's now much easier to park your bicycle with the increased number of bicycle parking spaces we've added on campus, 72 next to the Sports Centre and 120 secure spaces next to the CSCB.

## Secure bike lock-ups

Our new secure bike lock-up facility between the O'Brien Centre for Science and James Joyce Library means your bikes are more secure than ever.

## Walk Safe

Our Walk Safe service is available if you would like to be accompanied while walking through campus at night.

## New shower and changing facilities

Have you tried the upgraded shower and locker facilities in the O'Brien Centre for Science? They're free for everyone to use.

# What else has been happening?

## Campus Development

Have you noticed the new LED lighting and CCTV around campus? We're working hard to make the campus an even safer place for everyone.

## 2 bike awareness days

With cycling tips and free cycling goodies for all. Check out the photos overleaf.

## 2 new electric car charge points

We now have six charge points on our campus with two additional charging points at Ashfield Student Residences.

## Join UCD Active Commuting Clubs

Join our Strava community and benefit from inspiration and encouragement, as well as a bit of healthy competition. Sign up to the Walkers and Runners group or Cyclists group and share your experiences. [www.bit.ly/UCDactivecommuting](http://www.bit.ly/UCDactivecommuting)

# So what's next?

---

## A new entrance

Subject to planning a new cycle and pedestrian entrance at Nova UCD will make access easier and safer. The new entrance is due to open in 2018.

## Life on campus

More students living on campus means less commuting. We are working on an ambitious plan to deliver more accommodation by 2020/2021.

## Woodland walks markers

Distance markers along the walks will help runners, cyclists and walkers make the most of the beautiful trails.

## A new bus route

The NTA are planning a new route from Tallaght to UCD. We'll keep you posted on the progress of the proposed new 175 bus service.

## Even more cycle parking spaces

More parking spaces means more room for cyclists on campus. Get on your bike.

## LED lighting

To improve light levels and deliver a greener campus, we are upgrading existing external lighting to low-energy LEDs across the campus.

# What can you do?

---

## Ditch the car

Swap the car for public transport one day a week and you can considerably reduce your carbon footprint and other harmful emissions associated with car travel.

## Feel the burn

Sydney Parade DART station and Windy Arbour LUAS stop are both just half an hour's walk away. You could burn up to 200 calories a day by walking to and from the stops.

## Under your own steam

Why not start by commuting one or two days a week by foot or bike? 5% of students and 2% of staff car drivers come from 2km or less to campus each day.

## Carshare

The UCD Students Union have set up a UCD Carpool Facebook page ([www.bit.ly/carpoolUCD](http://www.bit.ly/carpoolUCD)) to make it easier for you to find others to share with. The NTA also has a dedicated page for UCD Commuters ([www.carsharing.ie/ucd](http://www.carsharing.ie/ucd)).
